

Tales of the Un-Inspected
Home Number 121
By Eileen Chubb
(Copyright November 2012)

This Home is owned by Company x which also owns homes 119 and 120.

The information given to the public in CQC inspection reports.

The home is inspected in June 2012 as there are concerns about medication and consent to care. These two areas are found non-compliant. The next inspection takes place 8 weeks later in September 2012, medication and consent to care is checked and now judged compliant.

The information not available to the public.

A freedom of information request I obtained from the Local Authority gave me the following facts.

For a two and half year period prior to company x taking over this home there was **1** safeguarding alert from outside the home.

For a period of 1 year after company x take over there are **4** safeguarding alerts from outside the home,

1 from CQC, Neglect.

1 from a relative, Neglect and Physical Abuse

2 From local hospitals Neglect.

There is a pattern that cannot be ignored so I decided to look at other homes owned by company x. My reports on each will be posted soon.
