

Truth Must Speak Louder  
© By Eileen Chubb

I am not alone in my hope that after this Covid crisis is over, there will be some shift in public perception for the better about what really matters. That truth can somehow win over the lies if you fight hard enough and long enough.

Every whistle-blower battles against the lies, smearing and bullying, but what I find the hardest is battling against a political system that has embraced the totally compromised organisation, WBUK.

I have published robust and comprehensive evidence to show that WBUK **are not** a genuine support organisation but that they have an agenda that will cause more harm to genuine Whistleblowers than even the worst of employers would struggle to equal.

The past few weeks I have worked to the point of exhaustion to help the deluge of Whistleblowers contacting our helpline, what has disheartened me is not my workload but that I am being contacted by many Whistleblowers who contacted WBUK first and were not helped.

All the evidence re WBUK is on our website. I am not going to keep citing it because I have concluded that MPs endorse WBUK precisely because WBUK know nothing about whistle-blowing so they are easy to deal with because of that very ignorance. MPs do not want to deal with the inconvenient evidence that we have given them repeatedly.

Instead of repeating all the evidence yet again I will just let a few key facts uphold the truth. Please note that every month of the year the same comparisons could be made between the two web sites.

During the Covid crisis our helpline has followed the logical pattern, in that staff such as cleaners, Care workers and nurses will be the vast majority of people contacting a whistleblowing support organisation.

The work we have done highlighting those whistleblowing on the front line is evidenced on our website.

I ask one thing, look at the below screen shots of two websites during Covid 19 and choose from the following options,

Are both running a similar help-line?

Is only one a genuine whistleblowing support organisation?

Which one is genuine based on the facts?

## **CEO Georgina Halford-Hall comments on doctors being "gagged" on NHS PPE shortages.**

April 2, 2020

Whistleblowers UK chief executive Georgina Halford-Hall told the Morning Star yesterday that it had spoken to a senior clinician who was considering resigning over fears of retaliation for speaking out.

The unnamed worker also feared that the "inconsistent and unclear advice" being given by their NHS trust was endangering staff, patients and the wider population, she said.

Although Ms Halford-Hall noted that it was "not unusual" to hear such concerns from medical staff, she said that to hear them from a very senior practitioner was.

### Tue 28/04/2020 - The Care Industry Billions

The Below report published in November 2019 by The CHPI is recommended reading especially at a time when those representing the Care Industry such as, Care England and The National Care Forum are using the Covid 19 crisis to once again call for more funding. Many small care homes may well be struggling but it can not just be assumed without a proper audit that care homes are running at a loss. Public money needs to be targeted at those genuinely in need.

### Thu 19/03/2020 - Concerns Raised About WBUK Solicitor

The attached lists our detailed concerns about the solicitor used by WBUK to threaten us, via a letter ( Which was addressed to me but never sent to me either by email or post) but which was sent to the publisher of my new book *There Is No ME*

We are well aware that highlighting the truth will result in more underhand threats from WBUK who will no doubt threaten to destroy this tiny charity for pointing out our evidenced work helping thousands of people.

Compassion in Care evidence for Edna's Law

**8000** Whistleblowers

**5000** Families of Abuse Victims

**6000 plus** Members of the public who have signed the Edna's Law petition

I always thought that it should be enough that our work shone a light on WBUK and revealed the scant cloak that in reality is the "Emperor's new clothes" that WBUK hide behind.

All our evidence, all the facts about WBUK have been put before MPs.

It saddens me that **I now have to warn all Whistleblowers not to trust a single member of the current Parliament** or their regulator, Parliamentary standards. All the evidence shows they do not care about Whistleblowers at all regardless of what they publicly.

We take Edna's Law to the people.

Meanwhile we will continue the hard work and keep exposing this, **I hope one day we will live in a world where those in power value what's true instead of what's easy.**
